Note about CPR/AED/First Aid Blended Learning:

Blending Learning is a combination of online learning followed by an in person skills check session that replaces the full face to face in person class. Blended Learning Participants **must register** with the instructor. The instructor will contact the participant by email with a link to the online portion of the class. You must complete with a passing score the online training before skill check. The participant must then attend the Skills Check session to successfully complete the course. Skills Check Sessions are held in conjunction with CPR/AED/First Aid Challenges.
